

## LANDSCAPES WITH ANGELS

### *The Moral Imagination in Fantasy*

*The Proceedings of the Institute's summer conference in Oxford*

The popularity of *The Lord of the Rings*, *Harry Potter* and *Narnia* speaks for itself. Without their being aware of it, the rising generation is receiving its metaphysical and moral formation through the imaginative exploration of other worlds.

In 2004, in the historic setting of Oxford's largest college, the G.K. Chesterton Institute explored a genre deeply rooted in British culture. The edited Proceedings of this remarkable conference are now available as a handsome double issue of *The Chesterton Review*. As well as papers delivered at the conference, other articles and features have been added to this 310-page volume in order to make it an indispensable resource for the study of the fantasy genre, and the spiritual role of the imagination in human culture.
